The Meeting Ends, But the Work Begins

→ Unstructured Discussions

Meetings generate long, noisy conversations with no clear record.

→ Decisions Get Missed

Important resolutions are lost in the noise of back-and-forth dialogue.

→ No Accountability

Action items lack clear owners or deadlines — tasks get forgotten entirely.

Why Current Solutions Fall Short

Manual Note-Taking

Time-consuming, incomplete, and entirely dependent on one person's attention.

Generic Transcription

Produces raw text walls — no insights, no tasks, no structure.

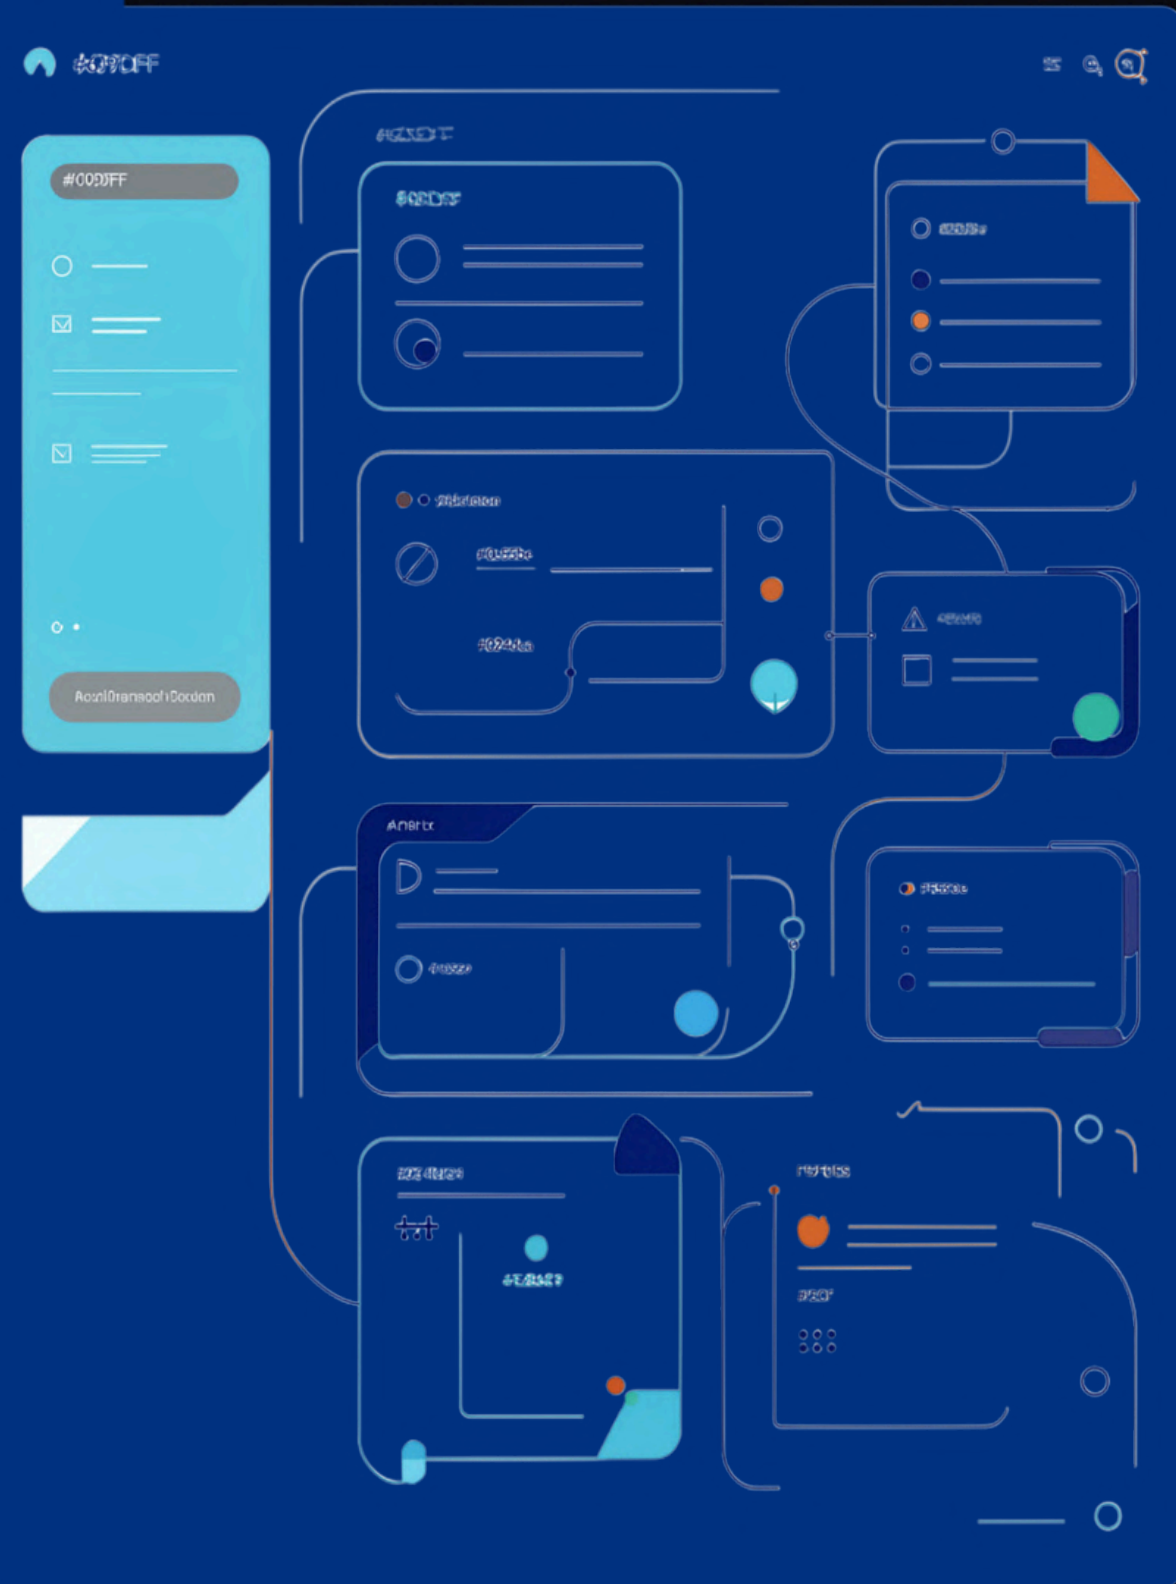

Separate Tools

Requires switching between platforms just to piece together what was decided.

Manual Documentation

Slow, error-prone, and rarely completed before context is already lost.

📄 We don't just transcribe. We convert conversations into actions.

Our Solution: AI Meeting Intelligence

Structured Insights

Transforms raw transcripts into clean, organized summaries.

Auto Task Detection

Identifies actionable items with assignees, deadlines, and priorities.

Professional Export

One-click PDF and Word reports ready to share instantly.

Team Notifications

Optional email alerts deliver task summaries straight to stakeholders.

The AI Processing Pipeline

Input

Preprocessing

AI Analysis

Extraction

Every meeting transcript flows through a purpose-built pipeline that strips noise, understands context, and surfaces the information that actually matters — structured and ready for action.

Intelligent Task Extraction

Our AI doesn't just read — it **understands**. From every conversation, it extracts the four dimensions of every actionable item:

What

The specific action that needs to be completed.

When

The deadline — explicit or contextually inferred.

1
Task Prepare marketing report

2
Assignee Rahul

3
Deadline Friday

4
Priority High

Live Example

"Rahul will prepare the marketing report by Friday, urgently before the client presentation."

Who

The person responsible for completing it.

How Urgent

Priority level based on language and context.

Context-Aware Priority Detection

AI evaluates language and context — not just keywords — to determine **true urgency**.

High Priority

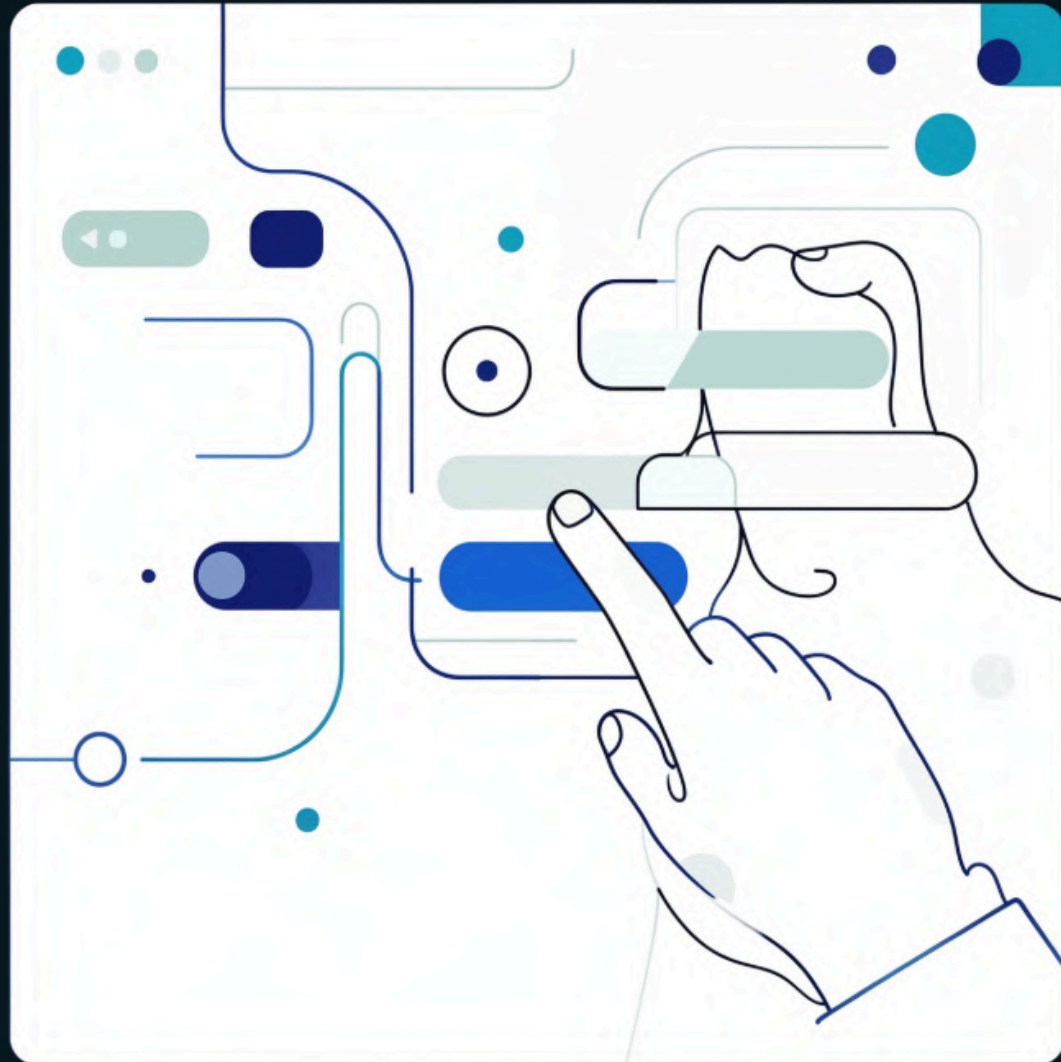

Urgent, ASAP, critical, before key meetings, client-facing deadlines

Medium Priority

Important, should complete soon, required this week, team-dependent

Low Priority

Optional, when possible, future improvement, backlog items

User Journey: Simple & Intuitive

01

Upload or Paste Transcript

Drop in your meeting text from any source.

02

Click "Generate Insights"

One button triggers the full AI pipeline.

03

AI Processes the Meeting

Seconds to analyze, extract, and structure everything.

04

Review & Edit

Browse summary, decisions, and tasks. Adjust if needed.

05

Export or Share

Download PDF/Word or send notifications to your team.

What Makes Us Different

Conversation → Action

We convert discussions into tasks — not just summaries. Every output is **ready to execute**.

Context-Aware Priority

AI evaluates urgency from **full context**, not surface-level keyword matching.

Responsibility Detection

Identifies **who owns** each action — no more ambiguity after meetings end.

Deadline Extraction

Captures both **explicit and contextual** deadlines from natural conversation.

Impact & Use Cases

Corporate Teams

Project reviews, client meetings, and daily stand-ups — fully documented.

Startups

Founder discussions and sprint planning with zero manual overhead.

Education

Faculty and student project meetings turned into clear deliverables.

Remote Teams

Online and cross-functional collaboration with automatic documentation.

Expected Impact

0

Missed Tasks

Eliminate dropped action items entirely.

100%

Accountability

Every task has a named owner and deadline.

10X

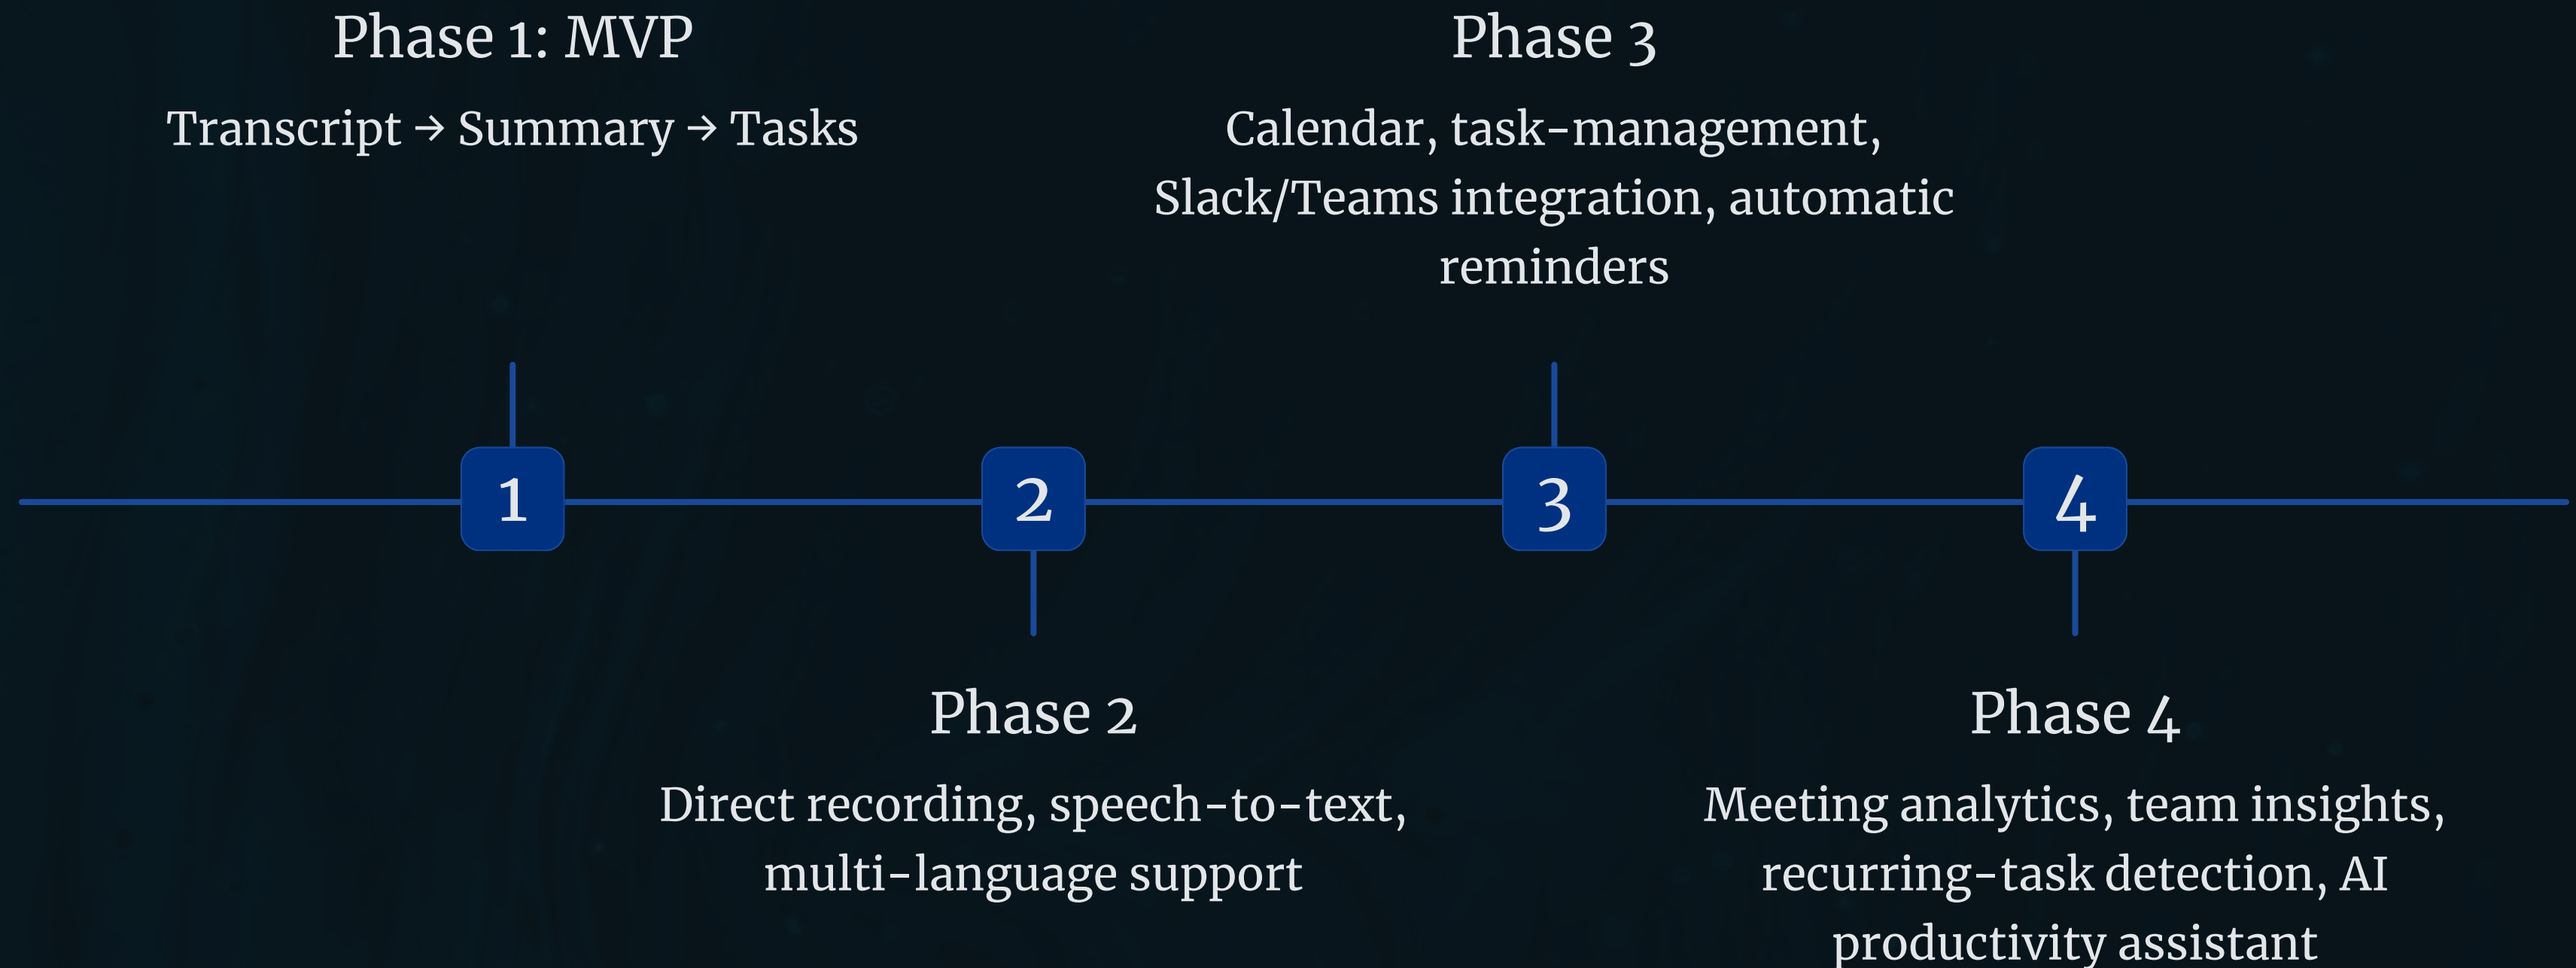

Faster Docs

Auto-generated reports in seconds, not hours.

📄 Listen less. Capture more. Act faster.

Future Scope & Vision

Our roadmap evolves from core meeting capture to a full AI productivity platform.

Every Meeting Should End With Clarity

AI Meeting Notes & Task Generator

Listen less. Capture more. Act
faster.
